

RETHINK.

A thermal cycler which is

- Half the size • Half the price • Twice the speed • Licensed for PCR ?

Piko™, inspired by the Italian word “piccolo,” meaning tiny, perfectly describes our new PCR system. At less than half the size of the smallest thermal cyclers on the market, this instrument relies upon our **Slidetiter™** vessels to achieve such compactness. The **Piko™** thermal cycler can complete a PCR protocol in less than 10 minutes. And with an automatic motorized lid, the CD drive-like loading of vessels, and multiple block formats, it is a natural fit for any lab.

Interested in testing? Just call us (061 486 80 80) or send an e-mail to info@bioconcept.ch to arrange an appointment for a demonstration in your lab!
