

We are  
**serving you.**

## Bioconcept

- Forty years of experience serving the Swiss biological community.
- 2015 the brand new liquid media production plant was built.
- 1993 BioConcept added the Amimed® brand to its portfolio.
- 1978 BioConcept was founded

AMIMED® is the brand name of BioConcept's cell and tissue culture product line. Manufactured in Switzerland we offer you a broad range of special and standard (classical) media and the opportunity to create the optimum menu for your cells. The production plant is not only excellently suited for the production of cell culture media; it can also be used to manufacture sterile QC liquids and microbial broths and agars. Our product line includes:

- Special customer-designed media
- Individual solutions for your cell culture problem
- Complete cell systems applications
- Standard media
- Serum free and animal component (ACF) free media
- Liquid and powder media
- Animal sera
- Buffers and balanced salt solutions
- Supplements and auxiliary reagents
- Lab equipment, services (Switzerland)

## Flexibility and Capacity

- BioConcept is a privately held company.
- BioConcept listens to the customers needs and does its utmost to meet them.
- Own powder and liquid media plants
- Liquids batch size from 5l up to 5,000l, containers from 1ml - 500l
- Powder batch size from 1 kg up to 800 kg
- Media can be delivered within a few weeks if needed.
- ISO 9001 standard and ISO 5 cleanroom

We are an experienced and expanding company that offers services from a conveniently located site in Switzerland near the Basel airport. This makes it possible:

- To establish close contacts with our customers and service-partners
- To define short communicative and logistic links
- Response to special customers wishes
- For customers to audit our facilities

We have been producing within a certified quality management system (ISO 9001) since 1995. The current ISO standard is 9001:2008.

## Facilities

In 2015 BioConcept opened its brand new liquid media plant. The plant was designed to uphold a maximum degree of sterility by using a state of the art air processing system and advanced machinery.

The automatic filling line can fill up to 2,000 500ml bottles of media in one hour. For the preparation of the bottles we use a cleanroom robot to maximise efficiency. All further steps, such as sealing and labeling, are also performed automatically. Our production plant sterile liquids fits the demands of GMP due to design qualification, installation qualification, operation qualification and performance qualification. The plant has the following characteristics:

- A productive area concept
- The purest water preparation facility (WFI)
- A complex air preparation facility
- Calibrated and qualified instruments
- Validated processes
- Educated and experienced staff
- Fully integrated SOP's
- Reliability and stable reproducibility of lots
- Comprehensive documentation of the production
- Traceability

*The roboter arm is part of the automatic filling machine*

*GMP A / ISO 5 Cleanroom with automatic filling machine*

# Innovation in Life Science and Services

BioConcept is your Partner for:

- **Pharmaceutical production media**
- **Customized cell culture media**
- **Sterile liquid solutions**
- **Powder formulations**
- **Classic cell culture**

# BioConcept is serving you:

## Swiss Cell Culture Media

CHO cell culture media (ACF)  
Insect cell culture media  
Hybridoma cellculture media  
Classical cell culture media  
Sterile salt solutions  
And more
