

Order Monarch Nucleic Acid Purification Kits and get 12 ice cream popsicle sticks for free!

Monarch nucleic acid purification kits provide fast and reliable isolation and purification of high-quality DNA and RNA from a variety of sample types using best-in-class silica column technology and a novel glass bead-based approach for HMW gDNA extraction. DNA and RNA purified with Monarch Kits is highly pure and suitable for use in a wide variety of downstream applications including sequencing, cloning, PCR and other enzymatic manipulations. Monarch kits are all designed for sustainability, using less plastic than leading suppliers and are packaged in responsibly sourced, recyclable material – all while being competitively priced and providing more value for your research without compromising quality. For convenience and flexibility, Monarch kit columns and components are also available separately.
