

CELL SIGNALING TECHNOLOGY

New Products – August 2022

Hot New Product

Osteopontin/SPP1 (E9Z1D) Rabbit mAb #88742

Osteopontin/SPP1 (E9Z1D) Rabbit mAb recognizes endogenous levels of total osteopontin/SPP1 protein. Osteopontin is a highly phosphorylated secreted glycoprotein expressed in a variety of cell types. Osteopontin, encoded by the gene secreted phosphoprotein 1 (SPP1), was originally isolated and cloned from a rat osteosarcoma cell line (1). Osteopontin is a highly negatively charged protein that likely regulates extracellular matrix turnover and remodeling, both in bone and other tissue (2). Osteopontin also has three highly conserved receptor-binding domains, otherwise known as arginine-glycine-aspartic acid (RGD) domains.

(Ref #): See [website](#) for more details.

Keywords: Fibrosis, cirrhosis, Alzheimers disease, inflammation

Related Products:
