As a company of scientists, we understand how important it is to work with antibodies that are specific and consistent from lot-to-lot. To ensure product performance, we validate all our antibodies, in-house, in multiple research applications. If a product does not perform in your experiment, the same expert scientists who produced your antibody will guide you through a few simple troubleshooting steps. If your issue is not resolved, we will replace the antibody or provide you with a credit.

Recognized as the 2019 CiteAb Life Science Reagent Supplier of the year, with most citations across antibodies, kits and assays.

That's why you can have confidence when you see the CST brand you're using the best antibodies available.
