Luna qPCR & RT-qPCR Products

New England Biolabs` Luna qPCR and RT-qPCR Kit Promotion

New England Biolabs offers a bright new choice for your qPCR and RT-qPCR. Luna products have been optimized for robust performance on diverse sample sources and target types. Available for dye-based or probe-based detection, Luna products can be used across a wide variety of instrument platforms. For superior RT-qPCR Performance, experience a novel, more thermostable "Designer" Reverse Transcriptase ("WarmStart RT") as an integral part of the Luna Universal One-Step RT-qPCR Kits. This new technology highly improves the performance and is paired with Hot Start Taq which increases reaction specificity and robustness.

The new **Luna Cell Ready Lysis Module and kits** are designed for direct RNA quantitation from cell lysate, bypassing traditional RNA extraction and purification steps. Coordinated cell lysis, RNA release, and genomic DNA removal is achieved in a 15 min protocol, with optimal RT-qPCR analysis obtained when the cell lysate is paired with Luna Universal One-Step RT-qPCR Kits.
