## qPCR & PCR Strip Tubes & Caps

Designed to precisely fit most thermal cyclers on the market today. Strip tubes with white wells enhance fluorescence signal strength, making them ideal for qPCR analysis when combined with an optically-clear flat cap. SnapStrip® tubes are customizable, allowing users to easily split the strip into smaller sections. Combination cap and tube packs are available in standard and Low Profile versions and are conveniently packaged in resealable bags.

- Secure, evaporation-resistant seal between cap and tube
- Ultra-thin walls for optimum heat transfer and reaction efficiency
- Optically-clear flat caps - ideal for qPCR and standard PCR
- Crystal-clear clarity - easy to visualize content of each well
- Available in full range of colors or white (enhances qPCR signals)
- Certified free from DNase, RNase, DNA, and PCR inhibitors
- Made in the USA

UltraFlux® i and SnapStrip® tubes have angularly attached caps, preventing interference from adjacent lids.

UltraFlux® i tubes feature robust interwell 3-point linkages that make strips more rigid and sturdy.

SnapStrip® tubes feature an easy-to-break single point linkage allowing you to use only the tubes you need.

## IsoFreeze® Racks

**Leave the ice buckets behind!** IsoFreeze® racks contain an inert, non-toxic, color-changing gel that maintains a temperature of less than 4°C for almost 4 hours (with lid on rack) at room temperature. Upon reaching 7°C, the rack alerts the user by undergoing a distinct color change from green to yellow or purple to pink. An ideal combination of function and utility, these racks can go from freezer to lab bench without having to transfer samples.
